Compound Cell Classification: Variform Polyvinyl Chloride (PVC) compound is defined as 13344-B in conformance to ASTM D 1784 [1/8 inch Izod specimen].

Weathering: Environmental exposure testing conducted in three environments; dry, hot climate (Arizona), hot, humid climate (Florida) and northern temperate climate per ASTM D 3679.

Color Monitoring: Lot-to-lot color monitoring conducted by Spectrophotometer per Standard Test Procedure CQA332Q3.

Lock: Precision formed using post formed technique.

Product specifications are accurate as of the printing date of this specification sheet.

VSI Fire Statement: Rigid vinyl siding is made from organic materials and will melt or burn when exposed to a significant source of flame or heat. Building owners, occupants and outside maintenance personnel should always take normal precautions to keep sources of fire, such as barbecues and combustible materials, such as dry leaves, mulch and trash, away from vinyl siding. The Variform research and development team has developed a proprietary revolutionary technology - PermaHue®.

For a complete listing of certified products and information about the fire properties of vinyl siding, contact the Vinyl Siding Institute, 1201 15th St. NW, Suite 220, Washington, D.C., 20005 or visit the VSI website at www.vinylsiding.org for a current listing of certified products and colors.
